

	Age	Gender	Race/ Ethnicity	What creek are you telling us about	How often do you go that creek	Why do you go to that creek	What do you like about that creek	What do you dislike about that creek	What have you observed at that creek	Would you consider this your creek	What is your favorite creek
1	52	Female	White	Barton	A few times a year	It's close; it's got a variety of hikes (challenge and distance); it's dog friendly; it sometimes has water for swimming or just enjoying its sound and prettiness.	See above, same answer.	Bicyclists who don't follow trail etiquette and who assume everyone can just hear their derailleurs; they need to shout "on your left" or whatever, and they need to stay off the trail when it's wet enough for their bikes to damage it and thereby contribute to erosion. Off-leash dogs who are out of control (not talking about those dogs that have a solid "verbal leash" and mind their owners). Dog owners who don't pick up after their dogs (which contributes to pollution in the watershed)--so disgusting! People who don't pack out their trash or who bring in alcohol in glass bottles that get broken and cut up peoples' and animals' feet.	Snakes, squirrels, cardinals, mockingbirds, lizards, other birds I don't know the names of, all kinds of flowers, magnificent oaks (Druids grove), a fork tree, sunfish (Rio Grande perch?) that bite you when you swim in their territory, the fault line responsible for Twin Falls, and so much more. I once saw part of a local band jamming at Sculpture Falls, playing on acoustic guitar and bongos, a very Austin experience. I also once saw a tattooed girl swimming with her pet iguana on a leash--who knew they swim!	Yes	Barton
2	55	Female	White	Barton Creek	A few times a year	Barton Creek and the Greenbelt are the best! It's easy access from anywhere in the City and the best place for hiking, biking, walking your dog, or just getting out in nature.	It's a beautiful piece of heaven right in the heart of the City. Also, when we do have rain, the creeks are full and the falls are roaring!	People who litter.	Happy people, happy dogs & happy kids! When you get to the bottom when the water is flowing, its the freshest air around!	Yes	Barton Creek
3	29	Female	White	Barton Creek (Greenbelt)	1-3 times per month	It's not the closest to me, but it is worth the drive because of the amenities it offers.	The trails, swimming, dog-friendly	Popularity that can overcrowd the trails, and attracts people who don't treat it well (littering).	Lots of people, dogs, interesting topography, drastic change in water level throughout the seasons	No	Barton Creek, but partially because I haven't explored the others.
4	40	Male	White	Barton Creek upstream of the recharge zone	1-3 times per month	The access point is close to my house, the trail and greenbelt are fantastic and maintained by the neighborhood, the creek is beautiful, and my section of Barton Creek tends to not be very crowded. There are great swimming holes deep enough to fully immerse yourself.	The creek is beautiful, it has nearly perennial water flow except in extreme drought, it is generally not crowded, it has a very wide riparian area. Most of the trails are shaded. There is a diversity of habitats (woodland, meadow) in the riparian areas. There is a diversity of aquatic habitats (riffles, runs, and deep pools)	On the hilltops there are some houses that detract from the otherwise undeveloped view and aesthetic of this reach	People swimming, fishing, hiking, kayaking, tubing, rope swinging. Lots of fish, turtles, wading birds, and aquatic wildlife. Incredible wildflowers and native plants, trees, grasses, and shrubs.	Yes	Barton Creek
46	60	Female	White	Robert E Lee Tributary (of Barton Creek)	Once a week	I lead a volunteer neighborhood group that has adopted the creek. I go to check on the conditions to determine if there is a need for a group work-day, to water some of the plants we have planted, and (when it rains) to check on the condition of the creek as a result of run-off.	This was a mowed creek until 3 years ago. What I like most is how quickly so many species have occupied the creek.	Trash.	Birds; also small rodents (volls?) which have brought in more red-tailed hawks.	Yes	Seco Creek -- west of San Antonio where I grew up.
